

Ahmed Hani Abdel Halim El-Gohary

Mechatronics Engineering Student

Cairo, Egypt | ahmedalgohary215006@gmail.com | +201097021034 | <https://www.linkedin.com/in/ahmed-hani-algohary>

PROFESSIONAL SUMMARY

First-Class Mechatronics Engineering student at The British University in Egypt expected to graduate in 2028. Possesses practical experience in mechanical maintenance, manufacturing operations, engineering design, programming, and industrial automation through multiple internships and technical projects.

EDUCATION

Bachelor of Science in Mechatronics Engineering The British University in Egypt (BUE), Cairo, Egypt

- **Expected Graduation:** 2028
- **Current UK Weighted Average:** 73% (First-Class level)

SKILLS

- **CAD & Design:** SolidWorks, 3D Modelling, Assemblies, Design Visualization, Basic FEA, Motion Simulation.
- **Programming:** C, Python
- **Electronics & Control:** EasyEDA, PCB Design, Basic PLC Knowledge, Sensors and Actuators
- **Engineering Analysis:** Material Selection, Failure Analysis, HVAC Load Estimation, COP and IPLV Evaluation
- **Maintenance & Manufacturing:** Preventive and Corrective Maintenance, Fault Identification, Manufacturing Processes
- **Productivity Tools:** Microsoft Word, Excel, PowerPoint
- **Soft Skills:** Teamwork, Problem Solving, Time Management, Self-Learning, Adaptability

INTERNSHIP EXPERIENCE

➤ Gas Facilities Engineering Trainee | Egyptian Natural Gas Company (GASCO), Fifth Settlement, New Cairo, Egypt

Aug 3 - Aug 26, 2026

- Completed a 144-hour summer training program within the Gas Facilities Department, gaining exposure to a professional industrial environment and real-world engineering operations.
- Developed an understanding of gas facility operations, engineering practices, workplace safety, and technical workflows within the natural gas industry.
- Enhanced technical and professional skills through practical guidance, career-development sessions, and an applied workshop on the effective use of artificial intelligence in engineering careers.

➤ Mechanical Maintenance Intern | Suez Steel Company, Suez, Egypt

Jul 2026 – Aug 2026

- Examined preventive and corrective maintenance procedures for heavy industrial equipment across multiple steel production plants.
- Traced the steel production cycle across melting, casting, and rolling plants, identifying the function and maintenance requirements of key equipment.
- Observed equipment inspection, fault diagnosis, and maintenance activities involving pumps, bearings, gearboxes, conveyors, and hydraulic systems.

➤ Mechanical Maintenance Intern | Modern Drilling Company (MDC), Badr, Egypt

Jan 2026 – Feb 2026

- Gained technical exposure to drilling systems, including top drives, mud pumps, rotary equipment, power transmission, and pressure-control systems.

- Studied the integration of mechanical equipment with electrical drives, sensors, actuators, feedback control, and automation to enable efficient, safe rig operations.

➤ **Mechanical Maintenance Intern | Smart Furniture, 10th of Ramadan City, Egypt**
Aug 2025

- Gained hands-on exposure to furniture manufacturing, industrial equipment, and mechanical and electrical maintenance practices supporting efficient production.
- Strengthened problem solving, teamwork, and cross-functional collaboration while developing awareness of quality standards, productivity targets, and workflow discipline.

➤ **Mechanical Maintenance Intern | Ideal Standard, 10th of Ramadan City, Egypt**
Jun 2025 – Jul 2025

- Gained hands-on experience with automated production lines, industrial machinery, sensors, control panels, and maintenance operations in a large-scale manufacturing environment.
- Developed an understanding of PLC-based control, electromechanical troubleshooting, and the integration of mechanical and electrical systems in sanitary ware production.

PROJECTS

○ **Multi-Channel Spiral Extrusion Twist Project | SolidWorks | 2025**

- Designed a complete 3D mechanical system in **SolidWorks**, incorporating a transparent housing for internal flow visualization.
- Performed **FEA stress analysis and motion simulation** to validate structural integrity and mechanical performance.

○ **HVAC Chiller Performance Analysis | 2026**

- Analyzed oil-free centrifugal chillers and estimated hotel cooling loads using **heat-transfer and energy-balance principles**.
- Evaluated full-load and part-load performance under 40°C ambient conditions using **COP and IPLV metrics**.

○ **Maintenance Management System | C Programming | 2026**

- Developed a C-based maintenance management system featuring machine registration, maintenance request tracking, end-of-life monitoring, and an operational dashboard.
- Implemented data structures, date validation, file handling, input validation, and save/load functionality to support reliable equipment records and maintenance scheduling.

○ **12V DC Regulated Power Supply | Electronics Project | 2026**

- Designed and implemented a regulated power supply that converts **220V AC to 12V DC**, incorporating a transformer, bridge rectifier, smoothing capacitors, and an LM7812 voltage regulator.
- Developed the circuit schematic and PCB using **EasyEDA**, then assembled and tested the prototype, achieving a **12.12V** output with a ripple factor below **1%**.
